Operating Lease and Sales-type Lease Receivables

We are the lessor of certain vehicle and solar energy system arrangements as described in Note 2, *Summary of Significant Accounting Policies*. As of December 31, 2021, maturities of our operating lease and sales-type lease receivables from customers for each of the next five years and thereafter were as follows (in millions):

	Operating Leases	Sales-type Leases
2022	$ 1,024	$ 91
2023	779	91
2024	458	100
2025	218	95
2026	192	39
Thereafter	1,906	11
Gross lease receivables	$ 4,577	$ 427

The above table does not include vehicle sales to customers or leasing partners with a resale value guarantee as the cash payments were received upfront. For our solar PPA arrangements, customers are charged solely based on actual power produced by the installed solar energy system at a predefined rate per kilowatt-hour of power produced. The future payments from such arrangements are not included in the above table as they are a function of the power generated by the related solar energy systems in the future.

Net Investment in Sales-type Leases

Net investment in sales-type leases, which is the sum of the present value of the future contractual lease payments, is presented on the consolidated balance sheets as a component of Prepaid expenses and other current assets for the current portion and as Other non-current assets for the long-term portion. Lease receivables relating to sales-type leases are presented on the consolidated balance sheets as follows (in millions):

	December 31, 2021	December 31, 2020
Gross lease receivables	$ 427	$ 102
Unearned interest income	(50)	(11)
Allowance for expected credit losses	(1)	—
Net investment in sales-type leases	$ 376	$ 91
Reported as:		
Prepaid expenses and other current assets	$ 73	$ 17
Other non-current assets	303	74
Net investment in sales-type leases	$ 376	$ 91

Lease Pass-Through Financing Obligation

As of December 31, 2021, we have six transactions referred to as "lease pass-through fund arrangements". Under these arrangements, our wholly owned subsidiaries finance the cost of solar energy systems with investors through arrangements contractually structured as master leases for an initial term ranging between 10 and 25 years. These solar energy systems are subject to lease or PPAs with customers with an initial term not exceeding 25 years.

Under a lease pass-through fund arrangement, the investor makes a large upfront payment to the lessor, which is one of our subsidiaries, and in some cases, subsequent periodic payments. As of December 31, 2021, the future minimum master lease payments to be received from investors, for each of the next five years and thereafter, were as follows (in millions):

2022	$ 33
2023	26
2024	18
2025	27
2026	28
Thereafter	395
Total	$ 527
